Economist | Development Finance, Applied Research, and Policy Evaluation

Professional Summary

Economist with over ten years of experience in applied economic research, policy analysis, and development finance in Latin America and the Caribbean. Currently working at the Inter-American Development Bank, leading the economic analysis and monitoring, evaluation, and learning components of operations in labor markets and social protection. Previously, at CAF Development Bank, I led applied research across multiple sectors, provided analytical advice to sector teams, and co-edited flagship reports on regional economic development. My experience combines quantitative economic analysis and causal inference with the design and evaluation of development policies and programs.

Professional Experience

2026–curr. **Economic Consultant – Social Protection and Labor Markets**, *Inter-American Development Bank*, Buenos Aires, Argentina

- Support the design, preparation, and supervision of IDB lending and technical cooperation operations in labor markets and social protection, including employment training, skills development, and conditional cash transfer programs.
- Lead the preparation of economic analyses and Monitoring, Evaluation, and Learning (MEL) plans, using quantitative methods and administrative and survey data to inform project design and assess development effectiveness.
- Contribute to theories of change, results frameworks, and operational documents, applying the Bank's development effectiveness tools, including DEM/sgDelta.
- Develop impact evaluation proposals and conduct applied economic analysis to support operational decisions, policy dialogue, and evidence-based recommendations for government counterparts.

2019–2025 **Economist – Socioeconomic Research Department**, *CAF Development Bank*, Buenos Aires, Argentina

- Co-edited flagship regional development reports, defining analytical frameworks, supervising contributions from internal and external researchers, mentoring research assistants, and synthesizing findings into policy recommendations.
- Led applied economic research on productivity, labor markets, infrastructure, energy, transport, and regional integration, using econometric, quantitative, and geospatial methods.
- Authored policy chapters on energy systems, green electrification, clean fuels, and transport infrastructure, translating economic analysis into policy recommendations.
- Provided technical and analytical advice to sector teams in energy, transport, and urban development, connecting research findings with policy and investment decisions.
- Designed the sampling methodology and oversaw the implementation of CAF's multi-country household survey, conducted annually across 12 Latin American countries.
- Co-coordinated CAF's Hands-on Data initiative, supporting public agencies in applying advanced data analytics to policy and service-delivery challenges.

2016–2019 **Research Officer – Socioeconomic Research Department**, *CAF Development Bank*, Buenos Aires, Argentina

- Conducted applied research and contributed to the preparation of CAF's flagship reports on productivity, institutions, and urban development.
- Supported analytical and editorial work for regional knowledge products, including evidence synthesis and coordination with internal and external researchers.
- Managed the implementation of CAF's regional household survey, coordinating external providers and internal research teams.
- Supported budget planning, procurement, and supplier management for the research department's work program.

2012–2014 **Research Assistant**, *Grant PICT 2008–0822, Institute for Economic Research*, Argentina
- Supported empirical research on crime, social programs, and income distribution.

Teaching

2016–2017 **Lecturer**, *Torcuato Di Tella University*, Buenos Aires, Argentina
Courses: *Introductory Microeconomics, Macroeconomics*

2015–2016 **Teaching Assistant**, *Torcuato Di Tella University*, Buenos Aires, Argentina
Courses: *Real Analysis (MA Economics and Econometrics), Introductory Microeconomics, Macroeconomics*

2013 **Teaching Assistant**, *Tucumán National University*, Tucumán, Argentina
Course: *Game Theory*

Selected Research

Articles and Working Papers

- **Labor Market Impacts of an Internship Program on People with Disabilities.** IDB working paper (2026). With Inés Berniell, Lucila Berniell, Belén Cañuelo, Victoria Castillo, Dolores de la Mata, Gerardo García-Oro, Néstor Grión, and Luis Laguinge. Estimates the causal effects of a subsidized internship program on formal employment outcomes among people with disabilities, using administrative records and a staggered difference-in-differences design. Examines employment persistence and heterogeneity across workers and firms.
- **The Effect of Split-Ticket Voting Costs on Effective Enfranchisement.** Published in *Electoral Studies* (2023). With Germán Villegas-Bauer. Examines how voting technology affects split-ticket voting and political fragmentation.
- **Local Shocks in Labor Markets: Competition and Information Flow Among Peers.** CAF working paper. With Lucila Berniell and Dolores de la Mata. Presents causal evidence on the effects of local labor supply shocks on young job seekers in Argentina, exploiting lottery-based program allocation and the ensuing exogenous variation in program saturation across locations.
- **Spatial Distribution of Formal Employment in the Autonomous City of Buenos Aires.** CAF working paper (2018). With Guillermo Alves, Lucila Berniell, Victoria Castillo, Daniel Fernández, and Sebastián Rotondo. Uses administrative records to analyze the spatial distribution of formal employment in Buenos Aires.

Policy Contributions in Books and Reports

- **Unlocking Growth in a Changing World: Innovation, Integration, and Formalization for Latin America and the Caribbean.** CAF flagship report (2026). Co-edited with Fernando Alvarez Parra. Develops a policy agenda for productivity and economic growth, focusing on formalization, innovation, and international integration.
- **Knowledge that Transforms: 20 Years Serving a Prosperous, Inclusive, and Sustainable Future.** CAF Report on Economic Development (2025). Co-edited with Fernando Alvarez Parra. Synthesizes CAF's research and policy contributions over two decades.
- **Access to Employment Opportunities in Urban Transport Systems.** Chapter in preparation for a joint CAF–IDB flagship report (expected December 2026). With Guillermo Alves. Examines how urban transport systems and the spatial distribution of employment affect access to job opportunities and labor market outcomes.
- **Green Electrification.** CAF Report on Economic Development (2024). With Walter Cont. Examines the transformation of electricity systems required for decarbonization, including implications for infrastructure investment and energy policy.
- **Energy Systems in Latin America and the Caribbean.** CAF Report on Economic Development (2024). With Walter Cont. Characterizes regional energy systems and quantifies energy losses throughout production, transformation, and consumption.
- **Clean Fuels.** CAF Report on Economic Development (2024). With Walter Cont. Examines decarbonization alternatives for hard-to-abate sectors and the policies needed to promote cleaner fuels.

- **Ecosystems and Biodiversity in the Face of Climate Change.** CAF Report on Economic Development (2023). With Ricardo Estrada. Examines the economic importance of ecosystems and policies for biodiversity conservation.
- **Transport Infrastructure.** CAF Report on Economic Development (2021). With Lian Allub. Analyzes transport infrastructure, trade costs, connectivity, and policies to improve the functioning of transport services.
- **Regional Integration, Physical Connectivity, and Global Value Chains.** CAF policy paper (2020). With Lian Allub and Walter Cont. Examines regional connectivity and infrastructure as determinants of trade competitiveness and participation in global value chains.

Education

2014–2015 **MA in Economics**, *Torcuato Di Tella University*, Argentina
Final project: Lucky Neighbors. Local Externalities from a Large-Scale Apprenticeship Program

2008–2013 **BA in Economics**, *National University of Tucumán*, Argentina
Final project: Electricity Pricing, Generation Costs, and the Distributional Effects of Implicit Subsidies

Technical Skills and Languages

- **Development effectiveness and evaluation:** Economic analysis of development operations, theories of change, results frameworks, monitoring, evaluation, and learning (MEL), impact evaluation design, and IDB development effectiveness tools (DEM/sgDelta).
- **Applied econometrics and impact evaluation:** Extensive experience in causal inference and the design of experimental and quasi-experimental evaluations, including advanced identification strategies addressing treatment heterogeneity, staggered adoption, and interference.
- **Economic and sector analysis:** Applied economic analysis of labor markets, economic infrastructure, and regional integration. Structural and reduced-form modeling.
- **Data analysis and survey methodologies:** Survey design, sampling methodologies, primary data collection, administrative and survey data analysis, geospatial methods.
- **Programming and analytical tools:** Stata, Python, Matlab, GeoPandas, QGIS.
- **Languages:** Spanish (native), English (professional proficiency), Portuguese (oral fluency).
